REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW. THURSDAY, FEB. 13th, 1930 Number 49

Local Representative Speaks in Legislature

Mr. Lang Refers to the Hanna Branch and Tilley Area

In his address at the provncial legislature last Monday Mr.Lang member for this constituency, again drew to the attention of the legislature the need of the completion of the Hanna Branch line to Redcliff. He also refered to Tilley East Area Commission and asked the house to give careful attention to the report of this commission to be presented at this session as it would have an important bearing upon the South—Eastern part of the province.

Speaking of Mr. Bakers proposed School bill Mr. Lang said there was much in it with which he agreed. One was the Equalization of the burden Educational taxation. Another was the Establishment of a provincewide Salary Schedule for rural School teachers, as it would do much to Stabalize the teaching profession.

He also approved of the increased Supervision mentioned in the bill. Mr. Lang also had some criticisms to offer for other clauses in the proposed bill He thought the principles approved of could be applied to the present educational system of local school boards. And that these principles applied to the present system of rural school administration will bring better results than if applied to the over-organization system proposed by the Minister.

But should the larger unit be adopted, then in order that the taxpayer may retain hi s rightful control over the teacher, there should be in each unit a superintendent exclusively the official of the board of Directors and independant of the Department of Education, and that he advise the Board regarding the engagement of all teachers. And that the inspector hold the same position in this large unit of area as he holds today in his inspetorate

Alberta to Have Mouth Health Campaign

Dept. of Health to have Campaign for better Care of Teeth

An educational campaign to teach better habits of living, more reasonable diet, better care of the teeth, and more thorough mouth hygiene and mechanical cleansing, is to be carried on for the next sixty days in Alberta.

This great Health Campaign, possibly the greatest co-operative health measure which has ever been undertaken in Canada will give every man, woman and child in the Province the opportunity of learning three very essential facts obout the care of the teeth.

It is the Canadian Dental Hygiene Council, a nation-wide organization, which is undertaking the campaign in Alberta, and it has received the most spontaneous assistance from the Departments of Heath and Education Every dentist in Alberta who is a member of the association will put in two days of his time without charge in connection with the campaign.

Preventive dentistry is the gospel which these men and women will carry throughout the country. The boys and girls of to-day are the men and women of to- morrow, and they will be healthier, happier, more efficient to carry on if they have learned early in their lives the proper method of care of their teeth gums and mouths.

Good Shows Booked For Cameo Theatre

"The Veiled Woman", which will be shown at the Cameo next Monday, is a drama of the dancing daughters of France. It is full of flash and color, giving Stirring revelations of the jazz age in Paris, and brutant glimpses behind the scenes of French gambling palaces with pretty girls as decoys,

"The Scarlet Daredevil", which will be shown next Thursday night. This is adapted from the Baroness Orczy's world famous novel "The Triumph of the Scarlet Pimpernell", a tale of hearts and Swords, love, intregue and hair raising adventures of a gallant gentleman pitted against the Arch-fiend of the French revolution with hundreds of people in mass scenes.

Can. Pacific President Declares Faith in Canada; Based on Fine Progress

E. W. Beatty tells delegates to Canadian Industrial Traffic League that "end is not yet" although this railway has spent $386,000,000 in past decade in improvements, new railway facilities, new hotels, new ocean fleets leading to deeper pride and patriotism in the Dominion.

E. W. Beatty.

That the Canadian Pacific Railway spent more than $249,000,000 on capital account in Canada for Canadian services during the past five years, and that "the end is not yet", was stressed by E. W. Beatty, Chairman and President of the Company before the members of the Canadian Industrial Traffic League at their banquet in Montreal recently. With the filling up of this country and the advancement of its commerce, not only will new construction and new territory be required, but vastly enlarged and improved facilities in the older districts will be needed because they will be outgrown by the needs of the communities for which they are provided," he emphasized when pointing his faith in the future of Canada and when urging upon his hearers and upon all other business men a "sympathetic regard for our needs and an accurate appreciation of what we have done and are endeavouring to do".

Declaring that the policy of the Canadian Pacific Railway was one of faith in Canada and intelligent self interest, Mr. Beatty supported his statements with a series of graphic and deeply interesting figures. This policy, he said, has resulted in capital expenditures of more than $386,000,000 during the past decade; improvements and new construction which provided Canada not only with improved railway facilities but with new hotels, new ocean fleets and with a deeper pride and patriotism in the Dominion as witnessed by the nation-wide response to the influence and appeal of the music festivals held in cities from coast to coast, which festivals, he emphasized, made a substantial contribution to the cultural life of this country and to its solidarity as a nation.

Railway problems, Mr. Beatty continued, were no longer the problems of the railway operators, directors and shareholders exclusively. More and more the transportation companies were taking the business man generally and the public at large into their confidence in order that they could appreciate railway problems and in turn give their intelligent support to the transportation companies. The companies have three functions to perform: to supply adequate service at reasonable cost; sufficient facilities to meet the needs of commerce, and to extend and construct ahead of settlement in order that additional development may take place. These factors, he said, require adequate compensation for the service they render and adequate more than $368,000,000 during the ate credit to provide new money for new enterprises. It was true that the Canadian Pacific was earning and paying seven per cent on capital stock from railway earnings, but more was required in order to create reserve necessary for annual capital expenditures or part of them. Members of the Canadian Industrial Traffic League would appreciate the fate of a company which had to borrow everything it spent.

Conditions in Canada during the latter part of 1929 resulting from the decrease in the western grain crop caused a serious decrease in railway earnings, but the decrease represented the result of an extraordinary combination of circumstances. The railways had not failed in efficiency nor had the country suffered from anything approaching a general depression. It was not a condition to give much ground for apprehension and the situation of 1929 was not likely to be repeated in subsequent years.

The Canadian Pacific Railway, Mr. Beatty said, had a peculiarly national significance in that 97 per cent of all its investments in rail, steamship, hotels, telegraphs and other activities was in Canada, and from the day of its inception its policies have been dictated by faith in Canada and by intelligent self interest. "I do not know of any combination of factors which tend more towards commercial supremacy than a combination of national sentiment, a sense of public duty and unremitting striving for efficiency, in order that the solvency of any undertaking may never be questioned and that its owners may be adequately rewarded," the president said, declared when emphasizing that the Canadian Pacific was outstanding in these factors.

"Improvements in physical conditions, construction of new lines and facilities is one way by which a corporation can show its faith and also its leadership", Mr. Beatty continued. "The Canadian Pacific in the past ten years has spent millions of dollars on capital account in connection with railways, it has done many things which represent a notable contribution, not only to its own facilities but to the communities in which its operations are conducted. In that short period of time, it has rock-ballasted over 2,000 miles of railway, it has increased the weight of rail and has block-signalled over 1,300 miles; also it has increased its rail mileage by almost 2,500 miles, which a few years ago would have been considered a considerable system in itself. It has built at Vancouver one of the most modern piers in the world for ocean and coastal freight and passenger service. It has completed construction and lining of the great Connaught Tunnel in the Selkirk Mountains at a cost of more than eight million dollars. It has borne its share of the cost of the great viaduct in Toronto. It has spent millions of dollars in enlarging, modernizing and strengthening its bridges and it has made the most conspicuous development through the efforts of Canadian engineers in designing and constructing the largest and most powerful locomotives in the British Empire.

The value of the Canadian Pacific as a good citizen was pointed out by the railway President. For many years, and particularly since the war the Canadian Pacific and many other companies have endeavoured to associate themselves with, and support many community movements and to assist hospitals and educational movements. The rules which applied to individual good citizenship also applied to corporations.

It was a frequent and logical complaint of railways in the United States that they were heavily taxed and that this taxation was almost crippling in its effect. There was no disputing the correctness of that statement insofar as many railways were concerned, but no railway in the Dominion of Canada, however, did not escape heavy taxation. In 1913 the Canadian Pacific's total tax bill was $1,382,000. In 1928 it was $8,038,178, an increase of 493 per cent. This sum represented taxes at the rate of $2.962 per day, $915 per hour, $15.25 per minute or 25¼ cents per second. The Company, he emphasized, was making a very substantial contribution to the Government of the country. The daily and daily tax bill $21,000 These figures indicated the contribution to day by day business and apparently the same basis to the total expenditure of all railways in Canada and he drew attention to the fact that the total sum disbursed exceeded $500,000,000, or a little more than $50 for every man, woman and child in the country.

Brig. Gen. Ross to Speak at Hat Legion

As a result of negotiations between the Alberta Provincial Command of the Canadian Legion and Brig.Gen. A. Ross, C. M. G., D. S. O. the Brig. Gen. will visit Medicine Hat Feb. 19th.

An open meeting for all men will be held in the Canadian Legion Hall, Medicine Hat on Wednesday Feb. 19th commencing at 8 p. m. A hearty welcome is extended to the Ex-service men of Redcliff and District to be present at the meeting. It will be well worth every effort to be present as the Brig. Gen will speak directly on subjects of vital interest and importance to Ex-service men.

The Brethren Church was well filled on Tuesday evening for the box social. The musical program put on by local talent was thoroughly enjoyed and there was keen bidding for the boxes.

Three Councillors Elected Last Monday

Champ, Shaw and Brydle Elected for 1930—31

The election for councillors created considerable more interest and excitement last Monday than was expected during the week. Four candidates were in the field with only three to be elected. The following was the result of the poll:

Champ	244
Shaw	239
Brydle	229
Sangster	179

At the close of the poll Returning Officer Wm. Henderson declared the first three mentioned, elected as councillors for 1930 and 1931.

In all 300 votes were cast and there were nine spoiled ballots Of the spoiled ones, some were marked 1, 2, 3; others with just a 1 after each name and some who voted for just one or two candidates.

There were a few surprises expressed after the vote. One was the splendid vote cast for Mr. Brydle who had done no canvassing and was not represented at the polling booth. Another was the large vote cast for Shaw who made his first attempt for municipal honors. Champ heading the poll and Brydle again elected showed that the electors appreciated the services of these two civic councillors who have been on the board for the past eight year. Sangster need not be discouraged. He polled a good vot for his first attempt. He was the youngest candidate in the field and will no doubt be asked to run again at some future election. The new council will be composed of Mayor Worts and councillors Champ, Champ, Campeau Brydle, Dacre and Shaw.

AIR MAIL SERVICE IS TO START MARCH 3rd

Air mail service on the prairie will be inaugurated on March 3. The main line of the service will connect Winnipeg, Regina, Moose Jaw, Medicine Hat and Calgary. Another route running between Edmonton, North Battleford and Saskatoon goes into operation on the same date.

Backed by governments and banks, by farmers and city folks, the Wheat Pool is standing by its policy of orderly marketing. A surprisingly large surge of opinion within the past week has supported the Pool as guarding the interests of thousands of prairie producers and aiding to stabilize financial conditions.

Local Trail Rangers Entertain The Dads

The Father and Son banquet held in Gordon Memorian school room last Friday evening under the direction of the Trail Rangers, was a great success from every standpoint. At the conclusion of the program it would be hard to say whether the dads or the sons enjoyed it most. The on may have won out in the trail item on the program—the supper—but at that it was only by a very narrow margin. The mothers knew what to provide to start the evening off properly. As the program advanced, however, the dads certainly wore a proud and contented smile," which left no doubt that they were thoroughly enjoying every minute, as each lad rose to make his speech.

After singing O Canada Mayor Worts started the ball rolling. He congratulated the boys on the success they were making of their organization and on being represented in the Boys' Parliament by Jimmy Brown, one of their members. He complemented Mr. Smith and the mothers on the interest they were taking in the boys and expressed the hope that they would receive the co-operation and support necessary for the continued success of the organization.

Jim Brown gave an interesting report of the recent assembly of the Boys' Parliament and also of the aims and objects of the parliament, which was along the lines previously reported in the review. The following was the toast list:

"What The Boy Expects from his Father"—Proposed by Elmer Congram and responded to by Mr. P Lavelle.

"What the boy Expects from the Community"— by Harold Leaming and Mr. H. Sangster.

"The Church"—by Eric Congram and Mr. J. Stratton.

"The Lads"—by Mr. C. T. Hall and George Kitchen.

Edwin Harris thanked the older boys for the assistance they had rendered the Rangers and Mack Martin replied .

Dr Endicot, Rev. Cann and Mr. Henderson also gave short addresses which were full of good advice for the boys present.

During the evening there was some real hearty community singing. Oliver Smith gave a violin selection and John Soukup gave a harmonica solo, both of which were well rendered and thoroughly enjoyed.

Strangers present pronounced it one of the best Father and Son banquets they had ever attended The manner in which the boys did their part was a real treat, and made the dads feel that Redcliff had the finest bunch of lads in the land.

LEGION IS TO MEET FRIDAY IN FUTURE

At the regular meeting of the local Legion held last Sunday it was decided to hold the monthly meetings in future on the second Friday of each month at 7:30 in the evening. The meeting also requested that the social committee put on a smoker on Friday, February 21st. It was the general opinion of the meeting that the social committee should get busy and arrange a serie of events during the balance of the winter.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Reduce Armies As Well As Navies

The outstanding event of this opening month of the new year is the assembling of the naval reduction conference in London, England, upon invitation of the British Government to the other Great Powers, to devise ways and means of securing a substantial lessening of the burden borne by all in maintaining huge navies, while at the same time, they are mutually pledged the one to the other and to all not to resort to war. The conference opens with every prospect of success attending its deliberations, and particularly so in view of the fine understanding already reached between Great Britain and the United States. The hopes and desires of all mankind are wrapped up in its success.

If an accord can be reached in regard to questions of naval strength the next step should, and undoubtedly will be, an endeavor to arrive at an agreement for the reduction of armies and other forms of land armament. If litary preparedness, so called, as distinct from naval establishments, imposes on even heavier burden on most nations. Nevertheless, the question of the size of armies seems to present the more difficult problem.

For example, here in Canada we can understand why the United States, with the Atlantic, and Pacific, and Gulf of Mexico bounding it on three sides, with its island possessions of the Philippines, Porto Rico, etc., and its ocean borne trade, should feel the necessity of a strong navy, but the majority of our people are at a loss to understand their need of a large standing army and an extensive National Guard or militia.

Following, as it did, the cordial reception tendered Premier Ramsay MacDonald by President Hoover, and the spontaneous acceptance of the invitation to the naval conference in London, Mr. Hoover's Armistice Day speech came as something of a shock in that he laid great stress,—many people believe too much stress,—on the old gospel of preparedness and particularly as it applied to the United States. Nor is this feeling allayed in President Hoover's first budget message to Congress, wherein he asks for increased appropriations for the army.

President Hoover's statement that sufficient forces must be maintained to prevent "the foot of the invader landing on our sacred soil," sounded like a sop to the militarists. There does not appear to be the vaguest possibility that any power or combination of powers contemplate any such fantastic step or that it is ever likely to happen. Canada and Mexico are the only two countries whose territory is contiguous to the United States, and this Dominion's permanent force of approximately 3,000 does not constitute a threat, nor has the U.S. anything to fear from Mexico. Why, then, such huge army expenditures?

President Hoover has taken a fine stand on naval reductions and also on the Kellogg anti-war pact, but if real progress is to be made towards world disarmament an even greater measure of enthusiasm must be displayed for reduction in land forces. In his address he referred to the fact that there are ten million men under arms in Europe, vastly more than in 1914. But, instead of attempting to formulate some plan whereby a reduction in these immense forces could be effected, Mr. Hoover seemed chiefly concerned in having the United States build up a bigger army to avoid invasion by these overseas millions.

Real friends of peace would have liked to hear President Hoover issue an urgent call to European countries to immediately start cutting down their armies, and, instead of advocating a still larger army for his country, he could safely have added weight to his plea by favoring a reduction, rather than an increase, in the United States land forces. The war-wearied peoples in all countries would have welcomed such a move by the United States.

Apparently the lesson that preparedness for war inevitably leads to war has not yet been sufficiently impressed upon the minds of the people. An enormous percentage of the four billions of dollars which Mr. Hoover asks Congress to provide in the next budget, is to cover the costs of former wars and to "prepare" for possible future ones. In 1928 the United States spent sixty cents out of every dollar on account of war financing. Another twenty cents went to the army and navy, making a total of eighty cents out of every dollar collected in federal taxes for military—and, in an economic sense, unproductive—purposes.

In that same year in Canada, a pacific nation, spending far less than other countries on war preparation and debts incurred by war, heavy as the latter are, 45½ cents out of every dollar expended by the Government was attributable to war.

In the light of these figures it is clearly evident that, if this damnable doctrine of "preparedness" is to be allowed to continue as the basis of international relations, all the efforts of the League of Nations, all Peace Pacts, all efforts of peace organizations will fail. The people must bestir themselves in order to avert the possibility of future wars.

An Extensive Collection

Man Surprised At Number Of Edgar Wallace's Books

A man recently went into an English library and asked for the complete works of Edgar Wallace. "The result," he said, "was extraordinary. A whole squadron of men marched into the reading-room with long steel rods over their shoulders. Clamped to these rods were rows of Edgar Wallace's books, in wood. They reminded me of the long poles which vegetable-sellers carry, with onions slung on to them." He said that there must have been in all something like 200 books, including some very early Edgar Wallace poems, in the Masefield manner, now completely forgotten.

Good Season For Furs

First Returns From Trappers In Northern Manitoba Are Favorable

A good fur season in northern Manitoba is indicated by first returns from the trappers, Dr. H. H. Elliott, commissioner for northern Manitoba, announces. During the past few years, the fur catch has been steadily decreasing, but this year a new cycle of successful trapping seems to have started.

The commissioner stated that the new regulations governing fur trade in the province seems to be proving satisfactory.

The number of trappers now working in the north has shown a substantial increase over the 1928 figure, Dr. Elliott asserted.

"John, you have been drinking my brandy."

"I have not sir."

"Are you quite sure?"

"Quite sure. I could not get the cork out."

Looking To the Future

New York Skyscrapers To Have Mast For Dirigibles

Alfred E. Smith, skyscraper builder, has announced that the 1,100 foot tower of the Empire State building will be surmounted by a 200 foot mooring mast for Zeppelin airships through which passengers can descend in seven minutes to the street, instead of landing at Lakehurst, 70 miles away.

Mr. Smith will go to Washington to ask Secretary of the Navy Adams for the help of navy engineers experienced in mooring mast construction.

Already, Shreve, Lamb and Harmon, architects of the 85-storey building, have consulted the engineers of the Goodyear Zeppelin Company, which contemplates transportation lines with the two great airships it is building.

The directors of Empire State, Inc., of which former Governor Smith is president, have come to the conclusion, he said, that in a comparatively short time there would be a trans-Atlantic, trans-Pacific and transcontinental airship lines, and possibly a line to South America.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Fish Fry Transported To Stock Western Waters

Over Five Million Fish Fry Deposited In Western Waters During Past Year

There should be a lot of new good sport fishing in Western Canada waters in a few years. A report issued by the Canadian National Railways shows that during the current year that company transported 5,352,000 fish fry or eggs for deposit in various waters in Western Canada. Pickerel and the following varieties of trout were included in the shipments: Loch Leven, speckled, brown, salmon, rainbow and Kamloops. The pickerel were all placed in prairie waters and the trout in mountain and foothills waters.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy enemy of pain, because they promptly remove the worms that cause the pain, and thus end the suffering of the child in short order. With so sterling a remedy at hand no child should suffer an hour from worms.

Hotel Cecil Is Sold

Famous London Hostelry Purchased By Oil and Gasoline Corporation

The Hotel Cecil, one of the most famous landmarks between the Strand and the Thames for the last 30 years, and patronized especially by overseas visitors, has been sold to serve as headquarters for a great oil and gasoline corporation. The purchase price was about $7,500,000.

The Hotel Cecil's disappearance is another proof of the tendency of all enterprises catering largely for visitors, both in amusement and accommodation, to move further westward in the city. The hotel possesses 900 bedrooms, and eleven banqueting halls, being the creation of a notorious financier, Jabez Balfour, who was brought back from refuge in the Argentine to suffer long imprisonment. The hotel was only partly built at the time of Balfour's crash. During the war it was the headquarters of the Royal Air Force.

"Where have you been?"
"In the hospital getting censored."
"Censored?"
"Yes, I had several important parts cut out."

Interesting Riel Letters

Valuable Historical Documents Are Received By Dominion Archivist

Collectors of historical Canadian documents would probably give considerable for those that have recently come into possession of Dr. A. G. Doughty, Dominion Archivist, consisting of letters to and from "President Louis Riel, of the North West Territories," written in March, 1870, at the time of the Riel Rebellion.

These documents include interesting copies of acts passed by the first session of the first legislature of Rupert's Land, of which Louis Riel was president, one of them being an act to establish a military force. This force was to consist of 50 men to be stationed at Fort Garry, and their monthly wages were set at $15 and board.

There are many interesting documents in the collection Dr. Doughty obtained from York, England, from relatives of a British soldier who apparently seized the letters at the Riel home and elsewhere during the rebellion.

"I was very fortunate in obtaining this collection of old letters and copies of acts, and it is a striking example of how old and historic documents wander abroad, and come to light in unexpected places," he said. Riel's proclamation prior to the rebellion, under the caption of "The List of Rights," set forth the reasons for the upheaval which came to be known in later years as the North West Rebellion. A copy of this important document, also the first act passed by the North West Territories legislature, with the letters in question, old and faded, but still decipherable and written in French and English, now repose in the Dominion Archives, packed in a book. They are considered exceedingly valuable by Dr. Doughty.

Advocates Canadian Type Of Architecture

Creation Of Travelling Scholarships Considered Good Method

Institution of Dominion travelling scholarships as a means of encouraging a spirit of emulation among architectural students with a view to the ultimate creation of a type of architecture distinct to the Dominion, is advocated by P. E. Nobbs, president of the Royal Architectural Institute of Canada.

Lecturing in the National Museum, at Ottawa, under the auspices of the Art Association, Mr. Nobbs made his plea for the encouragement of emulation among architectural students of the schools of Montreal and Quebec under governmental auspices, and those at the universities of McGill, Toronto and Manitoba.

The creation of travelling scholarships would be the finest method to bring this about, he believed, and as the initial step he suggested a scholarship at the British school in Rome.

In seeking to fulfil their ambition for a type of architecture distinctly Canadian, those of the profession were at present toying with modernity and interesting themselves less with the several traditions so actively competitive in pre-war days, the lecturer declared.

Cramped His Style

Old Mose Parker was pretty sick, and the darkey doctor promptly put him to bed and laid down all sorts of rules and regulations as to sleep and diet. After he had gone, Mose turned to his wife and complained:

"Mandy, how does dat dere fool doctor reckon Ah's gwine to eat breast ob chicken ebery day if Ah ain't got ma sheain's free?"

The population of the earth is said to double itself every 250 years.

Nearly 4,000 tons of lilies were used in China, this year, to make soup.

That Sore Throat Needs Minard's.

Complete Broadcasting Circuit

Canadian National Forges Last Link In Coast To Coast Radio Chain

By the completion of a broadcasting circuit from Edmonton to Vancouver, the Canadian National Railways have forged the last link in a coast-to-coast chain of radio stations. Announcement of the installation of the new circuit was made recently by the telegraph department of the system. The first broadcast to go over the new section took place on Thursday, December 19, when the Hart House String Quartet played before the microphone at Toronto. Up to the present, the Rockies have been a barrier against consistently good reception of eastern radio broadcasts, but now Pacific coast listeners will be able to hear the best concerts of the other centres of Canada. Contact between all parts of the Dominion may now be maintained by the medium of instantaneous transmission of speech. The vast radio network is an engineering feat which keeps pace with the progress of both Canada and the National system. The radio department will broadcast three hours weekly over the Atlantic-Pacific network and plans are underway for several commercial programmes to reach the coast.

Pocket Screen Stops Noise

Russian Invention Soon To People Who Like Quietness

A pocket screen to shut out noise is the invention of Leon Theramin, a Russian inventor. With this invention in his pocket, the peace loving man could ride all day through the busiest streets and yet enjoy the profound silence of a cathedral.

The "Russian Edison" has found that the principle of the ether-wave music instrument can be applied successfully in numerous other fields. His prophesies that adaptions of the electro-magnetic field will be of great significance in industry as well as in musical circles.

He also has provided for Theramin-vox orchestra. To make it possible for musicians to play his instrument in unison he has prepared a scale of colored lights to ensure even tone. He maintains that ether wave music is easier to master than any other musical medium.

Homes Of Steel

Steel houses, complete in every detail and including a bathroom, electric lights and central heating, are being planned for Paris. The houses can be constructed in eight minutes and can be erected on their sites in a few hours.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Some people are hard to please. They are always looking for trouble and are not satisfied when they find it.

A golf club has been invented which whistles when a drive is made correctly.

Minard's for the Ideal Rubdown.

New-born Negro infants are usually reddish chocolate or copper in color.

ZAM-BUK
Beats Any Embrocation In Winter Aches & Pains
Try a Box To-Day!

Whilst Zam-Buk has long been recognised as Canada's most popular remedy in skin troubles, how many know how better it is than any poisonous liniment for relieving the sharp twinges of rheumatism, sciatica or lumbago?

Zam-Buk is equally good for aching backs, stiff joints, sore muscles, cold in the head and chest, or sore throat.

Rubbed well into the affected parts, Zam-Buk's powerful pain-soothing essences soak right into the tissues, banishing soreness, congestion and inflammation. Others prefer to treat their colds so: they rub Zam-Buk between the palms of both hands and then inhale the evaporating medicinal balsams. This does the same good in another way.

Also For COLD SORES 'CHAPS' CHILBLAINS &c

Diet Business Is Serious

So Many Theories As To What a Person Should Eat

Something has got to be done about this dieting business. Time was when a fellow could sit down to a meal and think he knew what it was going to do to him. Now there are so many theories as to what it will do to him that he can hardly muster courage to do anything but drink. No matter what item on the menu he selects, he knows that somewhere there is a diet expert who believes it will induce sleepless night, absolescence, wear and tear, general depletion. His head swims as he thinks of the theories which have been earnestly laid before him by various friends, each theory positively based on the authoritative word of Doctor So-and-So, a very big man, of Doctor Such-and-Such, positively one of the biggest men in the country.—Harper's Magazine.

Sale Of Farm Seeds

Disposal Of Pedigreed Seeds Is Saskatoon Is Increasing Rapidly

A business that is expanding rapidly in Saskatoon is the sale of farm seeds. J. H. Speers estimated that the sales of pedigreed seed in the city has increased at least fourfold in the last five years. And there is still room for further expansion. "Five years ago," says Mr. Speers, "about 10 per cent. of the farmers knew what pedigreed seed was, and how it was procured. Now perhaps 50 per cent. have that information."

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Exports of ostrich feathers from South Africa in past years have amounted to $15,000,000 annually.

Foods Stay Fresh Longer This Way

Covered with Para-Sarl Heavy Waxed Paper goods that usually stale in a day or so stay *fresh* for quite a long time. Try it. Get Para-Sarl in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Hospitals For Drug Addicts

Proper Medical Treatment Under Right Conditions Would Produce Good Results

A resolution deploring the lack in Canada of facilities for the treatment of drug addicts was passed by a conference on medical services that was arranged by the Canadian Medical Association, and that was lately held in Ottawa. The conference suggested that the provinces amend their laws to permit of the care of habitual users of narcotics in hospitals and to provide for the commitment of such persons to those institutions for treatment. The conference thus reaffirmed the stand that the Ontario Medical Association took in an interview with the Government of the province last year. The association expressed the view that incarceration of drug addicts in jails and prisons was not an effective way of curing them of their degrading habit, and urged the Government to make provision for compulsory hospital treatment for addicts. It did not undertake to say whether such treatment should be given in a special institution or in one of the hospitals already established in the province. It did ask the Government to provide hospital facilities and to empower magistrates to commit victims of the drug habit to the institution possessing those facilities.

The conference in Ottawa, it is stated in passing its resolution, acted upon a suggestion made by Dr. A. J. Amyot, deputy minister of the Dominion Department of Health. In that connection, it may be recalled that an official of the department, Colonel C. H. L. Sharman, chief of the narcotic division, spoke in a report issued a year ago of the need for institutions for drug addicts. He pointed out that, at that time, Alberta was the only province of Canada which had an institution to which drug-users could be committed. Whatever success was being achieved in dealing with addiction he believed could be increased "if remaining provinces filled the crying need which exists for the provision of institution facilities within their borders to which narcotic addicts could be sent by physician practising in the province. Cases of addiction other than those of the underworld," said Colonel Sharman, "are known only in the strictest confidence, and I venture to state that if the medical profession had at its disposal machinery for handling the narcotic addict in a manner somewhat different from that of handling the insane, the results in some of the provinces, at least, would prove surprising and more than worth while."

Women Police

Turkey Considering Advisability Of Establishing Training School For Women Police

Success on the part of the women's police force of England has resulted in several European countries adopting a similar force. Turkey is the latest nation to express a desire to establish a training school for women police.

Commander Mary S. Allen's police pickets which were sent to the Rhine to co-operate with the British military police are taken as a working model. Early in the New Year, Commander Allen will visit Turkey and make a study of conditions before recommending a system suitable for Turkey. She intends to visit Constantinople for several months and make short trips to other leading cities during her survey.

The Oldest Trees

Christmas trees, as a family, are the oldest of all trees. Scientists say that their direct ancestors were the first flowering plants on earth. They are believed to have originated during a period of very severe climate, their needle-like leaves presenting less surface to cold and exposure than the broad-leaved trees that evolved in later periods of the earth's history.

"My fiance wants to be married very soon to the most charming girl in the world."

"The wretch! After promising to marry you."—Buen Humor, Madrid.

Where the Country Scores

People Living On Farms Have Many Things City Dwellers Covet

The other day a wealthy lady wished to bestow a gift that would bring real pleasure to the boys and girls of Chicago. Knowing children's interest in the "zoo," she decided to present to the gardens an animal the little people never had seen. Kangaroos, and lions, and bears, and giraffes had been on exhibition ever since the youngsters knew anything. What was she to do? Ah, happy thought! She would make detailed inquiry and find out the name of an animal the young Chicagoans never had looked upon. And here it was: The children of the windy, but mighty city, had never seen a cow. And so, pony found her place of proud preeminence to the loudly acclaimed delight of her youthful admirers.

Were those young Americans ignorant? They knew a thousand things about city life which their country cousins never dreamed. Alleys and lanes, and picture galleries, and gymnasiums, and equipped playgrounds were the dreariest of commonplaces to them. They were fed up on these things. But the common objects of the country filled them with wonder and surprise.

"We're tired and hungry and out of gasoline," the owner of a large motor car said to an Ontario farmer's wife one day noon last summer. "Can you let us have a little gasoline till we get to the next filling station?"

"Surely! Sit in and have a bite. We're sorry we have nothing fine for you!"

"Lady," said the big business man, after he had finished his meal, "New York has nothing like that; homemade bread, new potatoes, home-cured ham, wild strawberries, Jersey cream, and fresh June butter! These are dainties for the gods. I'm fed up with the cooking of the big hotel!"

The big crisp bill he left under his plate attested his appreciation.

Fed up! What a pity!

Good Feed For Poultry

Hens Do Better On Potatoes Than Corn Meal

Small unmerchantable potatoes may very profitably be fed to poultry. In an experiment planned to compare boiled potatoes with corn meal in the laying mash at the Fredericton, N.B., Experimental Station, it was found that the potato pens did even better than when corn meal was used in the mash.

Each group was fed a scratch mixture of two parts of cracked corn, two parts wheat, and one part oats. One group received 5 pounds of containing equal parts of corn meal, wheat bran, wheat middlings and crushed oats. The other group received a moist mash consisting of equal parts of wheat bran, wheat middlings and crushed oats mixed with boiled potatoes. The proportions fed were two parts potatoes and one part mash. Each group received charcoal, grit, milk, green feed and water.

The experiment ran from the first of December until the end of May in each of three years. The average egg production for the three years fed for the three years was 82.3 for the corn meal fed lot, as compared with 88.69 when the potatoes were fed. The potato feeding also showed an advantage in hatching results, as it is shown in the report of the station for 1928, published by the Department of Agriculture, at Ottawa, that in all the matings the hatches were higher from the birds, both males and female, that received potatoes instead of corn meal in the mash.

A Right Choice

Good advice in the form of an examination problem occurs in this selection from an examination paper set for candidates in a commercial test.

There are times in the life of every right-minded young man when he is troubled as to what he shall do for a livelihood.

A right choice from what the world offers is an important step, and the first thing to notice is that educated labor is nearly always in demand.

The essential thing is to have an object in life, an ideal with a you that will raise the character and excellence of your work.

Why He Liked the Navy

"Tell me, Pat," said the vicar to his ex-gardener, home on leave, "how do you like the navy?"

"Oh, it's a fine loife, sor, begob," said Pat.

"I'm glad you like it, Pat."

"Be jabbers, sor! Wance upon a toime I didn't think much av it, but now I see that water's the finest thing in the wurruld. Look you, your reverence, if there was no water in the wurruld, not wan of us 'ud learn to swim, and then what a lot of poor divils 'ud be drowned!"

A garden at Monterey, Cal., has a specimen of every kind of tree in the world.

A YOUTHFUL TRAPPER

Leo Dumontelle, 14-year-old Chapleau boy, is seen here with the pelts of two foxes he caught within a quarter mile of his home. The second fox was being attacked by a wolf when the boy approached and caused an exciting few minutes.

Etiquette In Egypt

Impolite For Arabs To Take Leave Of Host Until Asked To Do So

An English traveller in Egypt recently wrote: "Four of us have just returned from a five-day desert trip. Our caravan consisted of nine camels. On getting ready to turn in on one occasion, we were surprised to see a part of Bedouin horsemen approaching, and not being sure of their intentions we began to finger our revolvers. Stopping within a few yards of our camp, their leader came forward, and, after somewhat verbose salutations, explained that he was paying us a friendly visit. They soon made themselves at home and we gave them coffee. In return they offered us some filthy water, which we dared not refuse for fear of giving offence. They had been with us for some time, and we were dog-tired after a strenuous day's march. Were they ever going to move off? We learned afterwards that Arabs consider it impolite to take leave of their host until asked to do so. We, being on our best behaviour, would never have thought of suggesting their departure. It was past midnight, conversation had begun to lag, and we were all heavy-eyed. One portly gentleman began to do a little snooze. On being rudely awakened by one of his companions, I suggested he might like to take to his bed. They required no further bidding. After a hasty farewell the whole band were off like a shot."

Will Sell Canal For Song

Offer To Sell Desjardins Canal, Near Hamilton, For $1.00

Who wants a full-sized canal for the sum of $1? This bargain has been offered by the town of Dundas, and the canal in question is the Desjardins channel from Hamilton Bay to Dundas.

The canal was built about 90 years ago, and is owned by the town of Dundas, William Ainslie, of the harbor board, stated recently. The town still owns the waterway, but has offered it to the commission for the nominal sum of $1.

"I am in favor of buying," the commissioner said.

Sark, one of the English Channel islands, has many curious local taxes, one being paid in fowls by each house according to the number of chimneys it possesses.

Cannibals Misunderstood

French Traveller Finds Cannibals Nice Friendly People

Cannibals are nice, friendly people who really do not mean to eat human beings when they make a meal out of a plump missionary, or the fat chief of an enemy tribe. In fact, they would be very conscience-stricken if told that they had partaken of their fellowman.

That is the belief of Pierre Mille, French journalist and traveller, who has written in "La Quotidien" about his adventures among cannibals in the Congo. The whole misunderstanding about this man-eating business, he contends, hinges on the totem-pole, known as tanna in the language of many primitive people.

"The totem or tanna symbolizes to them people a mythical ancestor, generally an animal," explains Mille. "Each tribe believes it is descended from a lion, an elephant, a tiger or some other beast. As a consequence a tribesman is forbidden to eat of the animal symbolizing his tribe or any member of his tribe. He can, of course, make a supper on the people of another tribe because they are descended from another animal."

In other words, when a member of the lion clan, with Epicurean zest, digests a member of the cow tribe he is under the impression that he is merely eating a veal-cutlet.

Mille has observed that cannibals after being converted to the Christian or Moslem faith are immediately filled with horror at the idea of eating human flesh. They have come to realize that all men belong to the human race.

Relating a few of his experiences in the Congo, he writes: "I remember one day that my porters, who were very hungry, had captured a huge tortoise. Unhappily one of them believed he was descended from a tortoise. He refused to take part in the meal at first, but he finally gave in on account of the insistence of the others and his own appetite. After the meal, however, he became so terrified at what he had done, that he became violently ill."

When Man Carried Muffs

Fashion Common Up To Close Of Eighteenth Century

Though we are told that muffs are to be worn again this winter by women, it is highly unlikely that any of the once sterner sex will follow their example. Yet up to the close of the eighteenth century it was common for the well-dressed man to sport a muff suspended round his neck by a ribbon. Horace Walpole, writing to George Montagu, in December, 1765, says, "I send you a decent smallish muff that you may put in your pocket, and it costs but fourteen shillings."

Pepys took his wife's old muff into use, and let her buy a new one. But then Pepys was capable of edging his waistcoat with gold braid taken from his wife's best petticoat, "that she had when I married her."

The Return Trip

The late Booker T. Washington used to tell a story of his meeting a colored woman and asking: "Well, Miranda, where are you going?" "I'se goin' nowhere, Mr. Washington," was the reply. "I'se been where I'se goin'."

The United States had but 5,000,000 population in 1800, and Europe had but 150,000,000.

Travelling To the Stars

Professor Gives Idea Of Distance In Interesting Way

Prof. H. R. Kingston, of the University of Western Ontario, at London, desirous of conveying some idea of the distance between the earth and the sun, and between the earth and the moon and the nearest star, does this in a very interesting way. When we look at the stars, he remarks, we are inevitably struck with the impression that they are very, very far away. Yet our wildest imagination is scarcely adequate to comprehend their mighty distances. The sun, our star, is ninety-three million miles away, but this distance is only the first step on the road to the other stars. The very nearest of the more remote stars is about 275,000 times as far away as the sun, or over 26 millions of miles away. But this is really only the beginning of the story, since most stars are many times more distant—hundreds and even thousands of times as distant.

Suppose we start out for the nearest star on a train going a mile every minute, day and night. It will take us five months and a half to reach our moon, and one hundred and seventy-five years to get to the sun. To reach the nearest star, however, will take us over 40 million years. At mention of this figure we can do little but gasp, and we are forced to take a much faster train to cover the distance in a comprehensible time.

To visualize in still another way the distance to the nearest star, we may represent the sun by a small walnut, and the earth by a grain of dust eight feet from the walnut. On this scale the nearest star would be about 430 miles away. Surely our sun must be a very lonesome star in our universe!

Astounding as this distance is, only a few stars are even approximately as near as the one. Only about 500 known stars are within 100 light-years of our sun. The distance of the farthest stars in our universe is about 150,000 light years.

True Sportsmanship

British Always Friendly With Opponent When Scrap Is Over

At a banquet in London, England, which was a sort of festive reunion for the commanders who participated in the conquest of German East Africa during the war, the German General who was beaten in those regions was the guest of honor. The Prussian was cast this an incident showing again the incomprehensible mental state of Englishmen in general. Still they should not forget how these incomprehensible things work out. The German General, whose names is Herr von Lettow-Vorbeck, Gen. Smuts also once carried arms against the British Empire. Yet, afterwards, he was Commander-in-Chief of the British in Africa, member of the Imperial Cabinet, co-editor of the Covenant of Geneva, Prime Minister of a British Dominion. That is what Great Britain made of a one-time bitter enemy. The pacification of the South African Dutch, the most stubborn race on earth, and the country's elevation to a British dominion remains for all time one of the greatest triumphs of British liberalism. In the present instance the British officers showed they harbored no rancor. They are sportsmen, who appreciate the valor of an opponent, but are willing to shake hands with him the moment the scrap is over. It's better than brooding over revenge or allowing the other fellow to brood.

Settled the Question

Captain Proved His Point When Engineer Grounded Ship

Over the cabin table the captain and the chief engineer grew warm over which of the two the ship could best get along without, so, by way of a test, they agreed to swap jobs. The chief climbed the bridge and the captain dived into the engine room. Two hours later the captain suddenly appeared on deck covered with oil and soot. One eye was blackened and he appeared much the worse for wear.

"Chief!" he called, wildly beckoning with a wrench, "you'll have to come down here at once. I can't make her go."

"Of course you can't," replied the chief, calmly removing the pipe from his mouth," she's ashore."

A New Religion

"What is your religion?" the recruit was asked.

Promptly and smartly came the answer, "Militia, sir."

"No, no. I said 'religion'" I repeated.

"Oh, 'religion,' sir. I beg your pardon. I'm a plumber."

"Mister, how long do you keep your store open?"

"Six o'clock sonny."

"Can't you stay open till 7 tonight? If my daddy gives me a dime I'm going to buy some putty."

Manitoba Marble

Samples Shown In the East Attract Much Attention

The capital in the early part of December was alive with provincial premiers and cabinet ministers. While most of the visitors were concerned, primarily, with the natural resources negotiations, all of them had special missions which took them about the city and into various departments of the Federal Government.

Some of these missions were extraordinary, but to Hon. Donald McKenzie, Minister of Lands and Forests in the Manitoba Government, goes the distinction of undertaking a job as unusual as it was laborious. Mr. McKenzie put up with a vast amount of good natured chaffing on his way to Ottawa to attend the resources conference. He came by the most direct route possible, avoiding all unnecessary changes from one train to another and planning his trip so as to avoid long walks. The fact is that he brought along two heavy slabs and a multitude of little blocks of Manitoba marble.

Most people in the east raise their eyes at the mention of Manitoba marble. It is not commonly known that there is such a thing. Mr. McKenzie anticipated this skepticism in Ottawa, so instead of coming down to tell the Federal officials about it, he brought along a few life size samples to show what Manitoba has got to offer in the marble business. The samples weighed something over 40 pounds and, in addition to the usual paraphernalia caried by a public man on such expeditions, were no small burden. Mr. McKenzie, however, was brought up on a farm and is accustomed to carrying heavy loads.

The purpose of bringing Manitoba marble to Ottawa was to demonstrate its exceptional beauty and quality to the officials of the Federal Government, whose business it is to award contracts for public buildings and to stipulate in the specifications for these buildings the kind and quality of stone to be used.

It may be said that while Mr. McKenzie's line of attack was somewhat unusual, he achieved surprising success and was under no necessity to carry his samples home again. Officialdom at Ottawa was surprised and pleased to discover that such excellent marble stone is available in the prairie provinces. It is thought very probable that the specifications for the new post office to be erected at Brandon will call for the use of Manitoba marble.

As a matter of fact, two valuable commercial deposits of marble have been discovered in the province in recent years. One of these is now in production, is at Mile 40, Hudson Bay Railway. This marble is of excellent quality. The coloring varies from buff to a delicate, warm, rose ivory. The other deposit is in Africa, member of the Imperial Cabinet, co-editor of the Covenant of Geneva, Prime Minister of a British Dominion. That is what Great Britain made of a one-time bitter enemy. The pacification of the South African Dutch, the most stubborn race on earth, and the country's elevation to a British dominion remains for all time one of the greatest triumphs of British liberalism. In the present instance the British officers showed they harbored no rancor. They are sportsmen, who appreciate the valor of an opponent, but are willing to shake hands with him the moment the scrap is over. It's better than brooding over revenge or allowing the other fellow to brood.

Placing the Owner

Montgomery had just purchased a fine bid vase, and was endeavoring to impress his visitors with its antiquity. "Ah, it's a beauty! It belonged to General—er—General—er—what's his name?"

"Oh, ah, yes!" said a sarcastic friend, coming to his a'd. "General Dealer, wasn't it?"

Jenkins—Sorry I can't stop, old boy, but I've got to go home and explain to the wife.

Simpson—Explain what?

Jenkins—I don't know till I get home.

"Sir, would you give five dollars to bury a saxophone player?"

"Here's thirty dollars; bury six of 'em."

"Why is it we never hear of women cashiers absconding?"

"They always take the chief with them."—Lustige Sachse, Leipsig

WORLD HAPPENINGS BRIEFLY TOLD

Official France mourns Emile Loubet, former president who died recently at the age of 91.

Diplomatic relations between Great Britain and Russia formally resumed after a lapse of more than two and a half years.

The Canadian and United States delegation to the millenial celebration of the Icelandic parliament will sail from Montreal, June 15, aboard the S.S. Montcalm.

The Portuguese Government has authorized flour mills to import 100,000 tons of foreign wheat before June 1, 1930. The action was taken because of the small Portuguese crop.

A movement to erect a monument to the late Floyd Bennett as a token of Germany's gratitude for his heroism in attempting to rescue the Bremen trans-Atlantic fliers has been started.

The B.C. provincial government is distributing to the municipalities $550,414 as their share of liquor profits for the six months ending September 30, and $206,978 from parimutuel taxes.

Canada has registered with the League of Nations her agreement with the United States regarding the admission of civil aircraft; her agreement with Sweden exempting shipping from income tax, and the agreement between Canada, Cuba, the United States and Newfoundland relative to fisheries.

Despite rebates of $250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of $1,150,000 between April 1 and November 20, government officials state. At least $50,000 more is expected to be taken in by March 31, 1930, the end of the fiscal year.

Canadian National Places Large Order

Will Do Much To Relieve Unemployment Situation In Dominion

Orders have been placed by the Canadian National Railways for 120,000 gross tons of steel required for the construction programme of the National System during the coming year, it was stated officially at Canadian National headquarters. Of this total, 80,000 gross tons have been ordered from the Dominion Iron and Steel Company, and 40,000 gross tons from the Algoma Steel Mills, at Sault Ste. Marie. In addition to steel orders, nearly 5,000 box cars have been ordered. Of the car orders placed, the Canadian Car and Foundry Company are to deliver 2,250 fifty ton box cars, and 25 tank cars, each of 10,000 gallons capacity. The National Steel Car Company have received orders for 1,175 fifty ton box cars, and the Astern Car Company have been given orders for 200 refrigerator and approximately 1,000 box cars. The placing of box car orders has resulted in the manufacturers placing orders with the British Columbia Mills for some 15,000,000 feet of box car material. The placing of these orders has had an important bearing on the employment situation throughout the centres concerned. Inquiries are also being made by the Canadian National among locomotive manufacturers for the delivery of 18 Santa Fe type locomotives and 15 mountain type engines.

To Prevent Seasickness

After 36 years at sea, during which time he served as surgeon on the "Aquitania," Dr. Sidney Jones has retired. He has published a preventative for seasickness based on a study of this illness during his life on the ocean. Take no alcohol a week before sailing, eat sparingly, and avoid all acide foods, is his advice.

Buck—"Can you give me a definition of an orator?"

Private—"Sure. He's the fellow who's always ready to lay down your life for his country."

"You have painted your eyes very black."

"Yes, I am in mourning."—Esquella, Barcelona.

Status Of Dominions

Conference Brings To Light Important Developments In Empire's Constitutional Position

Another important development in the Empire's constitutional position has resulted from the International Air Conference, just concluded at Paris. Britain and the Dominions, though they signed the 1919 international air convention separately, hitherto had one joint vote at the convention, despite sometimes conflicting interests. Now it has been unanimously agreed that Dominions have separate votes and the alteration is embodied in a protocol which the Dominions have signed in alphabetical order, along with other nations.

New Colored Film Process

Swiss Company Is Formed To Exploit New Invention

A Swiss company has been organized to exploit a colored film process invented by the French scientist, Berthon. The price will not exceed that of ordinary film, it is said.

The invention, although not explained to the public, is understood to render colors possible by optical instead of chemical means, the color being registered by bands on each side of the film, as in the case of sound in "talkies."

Winnipeg Newspaper Union
Fashions

3140

(By Annebelle Worthington)

A Princess suggestion in novelty silk crepe that you'll thoroughly enjoy wearing for general daytime occasions.

It is in dark brown background printed in capucine tones, which gives it a sportive air and makes it so appropriate for shopping, office or classroom.

The deep turn-back flaring cuffs are of deep shade ecru lace finished with fashionable fur trimming band of Galyak. Black velvet ribbon may be used in place of the fur and is equally smart.

The collarless sunburst neckline is finished with youthful self-fabric bow.

It effects snug hips through fitted long-waisted bodice with point at front to lengthen its line.

The two-piece circular flaring skirt stitched to bodice, concentrates most fullness at front, so as to keep the silhouette slender with slim straight back.

Style No. 3140 is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

The making of this charming all-day dress practically means a two-piece skirt to be seamed and attached to two-piece bodice that has been closed at sides and shoulders.

Feather weight tweed, covert cloth, canton crepe, flat silk crepe, crepe satin and plain and printed velvet suitable.

Pattern price 25 cents.

IMPORTANT WESTERN CANADA INDUSTRIAL PLANT

One of the Western Canadian industrial plants, the refinery of Imperial Oil, Limited, at Regina, Saskatchewan, which supplies gasoline and oils for Western Canada consumption.

Recipes For This Week

(By Betty Barclay)

CINNAMON APPLES SUPREME

1 package vanilla junket.
1 pint milk.
6 apples.
1 cup sugar.
½ cup water.
3 tablespoons red cinnamon candies.
1 tablespoonful lemon juice.

Peel and core apples and place in baking pan. Make a syrup by boiling the sugar, water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, adding a little syrup. When cooled and the syrup has jellied, prepare vanilla junket according to directions on package and fill dishes. Let stand in a warm room until firm.

POTATO STUFFING FOR ROAST GOOSE

2 cups hot mashed potatoes.
1 teaspoon grated onion.
½ cup chopped walnut meats.
Paprika.
1 teaspoon salt.
¼ cup evaporated milk.
1 tablespoon butter.
Yolks 2 eggs.
1 teaspoon of poultry seasoning.

Mix the ingredients in the order given and handle as any stuffing.

A Good Gardener

Saskatchewan School Teacher Wins Silver Cup For Improvement To School Grounds

Michael Evaschisen is some gardener. For three years a silver cup has been awarded by the Canadian Horticultural Council, of Saskatchewan, for greatest improvement in school grounds during the year. Each time a school taught by Evaschisen has won the cup which was donated for the purpose by Prairie Nurseries, Limited.

Announcement of this year's winner was made at Saskatoon by A. R. Brown, director of rural education for Saskatchewan. The cup goes to the Krasny school district No. 1121, 12 miles south of Shebo. Last year the cup was won by the Wishart school, north of Punnichy, and in 1927 by Janwo school, 16 miles northeast of Prince Albert. Evaschisen was the teacher at all three schools, having spent a year in each place.

He is a native of Manitoba, attended school at Dauphin, and took third class normal work in Manitoba. He took his second class at Saskatoon, and spent a year at the Agricultural College.

Cactus That Shoots

Dr. E. C. Leonard, Smithsonian Institution scientist, tells of a thorn-shooting cactus, of Haiti. The slightest jar to the bush will cause the cactus pads to shoot forth in a parabola several sharp thorns. These travel with considerable force, and can penetrate leather at a distance of six feet.

His Worry

A business man returned from the city to find the maid looking scared. "I'm sorry, sir," she said, "but madam had an accident in the car this afternoon, and it's been completely smashed. "Good lord," said the aghast husband, "and my clubs were in the dickey."

The battle of Waterloo lasted only about eight hours.

Times Have Changed

People Too Used To Modern Improvements To Make Good Pioneers

It is almost invariably advanced in arguments regarding aid to immigrants that the latter have greatly deteriorated since the pioneer days of Canada when men and women invaded the wilderness with practically no resources and there hewed out homes and estates for themselves. Regardless of how the comparison may redound to the credit of the first settlers, it is of no help in solving the problem of colonization in Canada today. When this country was making its first bid for population the whole situation was parallel. Everybody was on the same footing. There were no millionaires, there was little luxury of any kind, no railways, no theatres, not even decent roads. The job ahead of the settler was to plunge into the wilderness and take the chance that others were taking. There were no distractions of ease or pleasure. The game was to eke out an existence under very difficult conditions, but equality was omnipresent. Today all the human beings that we can draw upon as colonists have seen something of comfortable existence, of motor cars, of railway trains, of luxurious homes, of fine hotels and theatres. They have witnessed the spectacle of a large percentage of other human beings go through life without engaging in grinding toil. It cannot be wondered at that they shirk the onerous task of tackling existence at the bottom. The environment has made that look like a waste of time and effort. Everyone hopes, in some way, to beat out the primitive methods of gaining a livelihood.

The Quality Of Mercy

Good Work Of Red Cross Society In Saving Eyesight Of Afflicted Child

In that far north land where the aeroplane is taking its mail today and linking the regions beyond with the centres of civilization, there lived a little child with a pair of beautiful bright eyes. Tragedy stalked in to the little girl one unhappy day, for she had the great misfortune to hurt herself with a pair of scissors while playing. Her eye was injured in a moment and in much pain the child had to endure the smarting ache. Anxiously her mothgr did what she could in first aid treatment, and to all appearances the eye healed up.

Two months later it was observed that the little girl was groping her way along, and in great dread the doctor was sent for. In that far northland medical aid is difficult to obtain. Hearing of the distress of the home a Red Cross Nurse hurried to see the child. The worst fears were realized, the child was evidently going blind. There was one hope, that with immediate care the other eye could be saved, but there was a long and tedious and most costly journey to be made to the distant city of Edmonton where eye specialists could be consulted. Communications with Headquarters of Red Cross in the capital city resulted in transportation to the sufferer. The sight of one eye had gone, but with immediate care and treatment, the other eye could be saved. Twice blessed is the work of the Junior Red Cross in extending mercy to the suffering child.

Loganberries were produced by crossing raspberries and blackberries.

Mid-Atlantic Airports Scheme

Artificial Islands Look Like Great Ironwork Piers

The idea of making a series of islands across the Atlantic as landing places for passenger-carrying aeroplanes that will one day ply the air between this continent and Europe has for long been the basis of romantic schemes. One such scheme is about to come true, and when it does, there will be eight floating islands between New York and Southampton, forming great stepping stones for the use of aircraft on regular scheduled flights.

These artificial islands are part of the equipment of a concern soon to exploit trans-Atlantic air service. The islands are known as Armstrong seadromes, after their inventor. Construction on them will begin this year. They will be anchored 400 miles apart, and will be landing ports for machines which expect to carry travellers from the United States to England or France in 15 hours.

Seen out of the water, the seadromes look like great ironwork piers. But they will float instead of stand. Thirty-two "legs" will support the seadromes, which will be 1,100 feet long, 400 feet wide and 350 feet high. The floating airports will be 80 feet above water, out of reach of the largest waves. The inventor says the peculiar construction will prevent all rolling or pitching. A hotel will stand on one side of each island, and a hangar and mechanics' quarters on the other.

Killed By Chinese Bandits

Three Missionaries Are Slain In Most Revolting Manner

The Rev. James G. Kellet, superior of Maryknoll Junior seminary, at Los Altos, Calif., told the Associated Press that he had received by mail details of the murder. In China, recently, of three Franciscan missionaries, Bishop Jans and Fathers Bruno and Rupert.

Father Keller said the missionaries were killed in a most revolting manner, Bishop Jans being literally hacked to pieces. The clergymen were captured by bandits. The death of these missionaries, Father Keller said, brings the total number of Catholic priests killed in China recently, to 22.

World's Largest Market

Smithfield Market, in London, England, said to be the largest meat market in the world, is shortly to celebrate its sixty-first anniversary. Some idea of its capacity can be had in the fact that 4,000 tons of beef, the equivalent of 60,000 sides, can be displayed at one time. More than 180 firms are contained in the building. In December, 1923, more than 20,580 tons of beef were handled there.

George Washington never lived in the White House. This edifice was not yet completed when he died.

The food of oysters consists chiefly of microscopic plants which are carried to them by the currents.

WINDOLITE
MADE IN ENGLAND

The Improved Glass Substitute

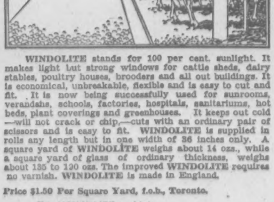
COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.



WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold —will not crack or chip,—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 190 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.50 Per Square Yard, f.o.b., Toronto.

VICKS VAPORUB

OVER 17 MILLION JARS USED YEARLY

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrel, the cigarette girl, but he doesn't know it. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry. Al's best friend. She and Perry take the child Al adores, and sail for France. Al, broken by the loss, becomes a derelict. Months later he drifts into Blackie's place and is saved by Grace Farrel, who makes him promise to stage a comeback. Al falls in love with Grace, and, while Grace is happy in his love, she often wonders what has become of Molly, and is worried.

CHAPTER XXVIII.

Grace realized that on many occasions when Al was silent he was thinking of his beloved son and wondering how Junior was faring. It was just about a year now since Molly had so cruelly taken him from Al and rushed off to Europe with John Perry. No word had reached New York concerning the slopers since that one message announcing that Molly was suing for divorce. This strange silence in itself was ominous to Grace. She knew that Al's life was inextricably bound up in Junior's and because of that Molly had a hold on him.

Perhaps Al sensed this feeling of instability in Grace. At any rate, he broached the subject near to her heart.

"Grace, you and I are going to be married one of these days?"

It was a question, not an assertion, and Grace looked at him with gently interrogating eyes, saying nothing.

"Will you marry me, Gracie?"

"Al, you know how I feel. You know I love you—of course I want to marry you. But—"

"But what?"

"You don't even know if you're divorced or not."

"I'm finding that out—the lawyers are working on it now. I would have brought it up before, but I wanted to be well on the way to recovery before I mentioned it to you."

"But what about Junior?"

A faint shadow crossed Al's face, then he drove it away." He had reasoned that out, too.

"I can't have Junior, anyway," he said. "Molly would never give him up. And I do want you, Grace. I want you so much. I love you dearly. I never stop loving you for a single moment. I think you're the most adorable and fascinating and beautiful person on earth."

Grace stepped closer and looked up into his eyes. "And I feel the same about you, Al," she said simply and sincerely.

. . . . . Meanwhile, what was happening to Molly in Paris?

During the first few months in the French capital and in the brilliant resorts along the Riveria she had been deliriously happy with John Perry. And she loved having Junior with her, too.

But Perry did not like Junior; the child was not his own and he often felt that the little boy came between him and Molly. Molly did not notice this at first, she only found increasing joy in the presence of the dark, handsome Perry. Never for a moment did she regret leaving Al and giving up the fame he had brought her on Broadway. She abandoned herself completely to her adoration of Perry, waiting impatiently for her divorce to be granted. This complete submersion of her character to the whims and demands of Perry astonished even Molly herself. Never had she believed it possible for her to forget herself so completely in thoughts of another person.

The couple travelled from one resort to another, spending money lavishly, but always circumspectly because the divorce had not yet been granted. When they journeyed to Deauville or Monte Carlo it was Molly's money that was used, for it turned out that John Perry did not have so much after all. He had earned the reputation of having a fortune simply because of his lavish spending on Broadway.

But during this period the relationship between Molly and John changed perceptibly. It was John who began to show signs of boredom and Molly who became more infatuated. One day when she was moody he did not forgive her as Al had always done. He simply went away and stayed a few days. When he returned in response to her begging letters she loved him more madly than ever.

Then came the day when Perry said, "Molly, I wish you couldn't have that child around so much. He interferes with our plans and he bothers me terribly."

Molly's voice trembled as she answered, "But I love him, John? What can I do with him?"

"Send him away," insisted Perry harshly. "Send him to a nursing home, or board him out with some family."

Molly gazed long into the handsome, irritated features of the man she loved. She realized she must do as he said if she would hold him. So little Junior was boarded out with a French family. It happened to be a family where he wasn't given good care, so his usually rosy cheeks became thin and pale. He was terribly lonely, too, and he often cried for his mother, his mother who only came to see him once a week now. Vaguely he remembered his daddy back in America, the daddy who had loved him so.

One day Molly realized that her money was dwindling with dangerous rapidity. John Perry asked almost daily for loans, which he wasted in gambling, and never suggested paying back. Molly was afraid to call him to account, afraid even to stop giving him money. With a deadly pain in her heart she sensed that she was on the verge of losing him. If she said a word he might up and leave her at a moment's notice, but if she kept silent he would probably marry her. And the divorce was due any day now.

Shrewd John Perry played pitilessly on Molly's infatuation for him, as pitilessly as she had once used Al's love became more uncertain with each to further her ambitions. His temper passing day and his demands for large sums of money more insistent.

Then came the day when Molly received news of the divorce. She was wild with happiness as she flung her arms about John Perry's neck.

"Now, John, we can be married! Isn't it wonderful!"

Perry put his hands lightly on her shoulders and looked down into her eyes with a quizzical expression. A show-down was at hand.

"Wonderful?" he said deliberately. "Well—maybe. And maybe not."

"What do you mean, John? Don't you want to marry me?"

"No; I don't think I do," he answered calmly.

Molly drew back. First her expression was beseeching, then came anger.

"After all I've done for you — to throw me down!"

Felt Tired and Miserable

"I took Lydia E. Pinkham's Vegetable Compound for miserable and tired feelings and it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite. I sleep well and am in pretty good spirits and able to work every day now. I recommend the Vegetable Compound and you may use this letter as a testimonial."—*Mrs Dekema Walaza, Union Street, North Devon, New Brunswick.*

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., Lynn, Mass. U. S. A.
Medicine, Tonic, Laxative

W. N. U. 1818

Perry merely shrugged his shoulders in answer.

Then fury broke loose in Molly. "You cheating dog!" She backed away from him, picked up a vase from a table, and sent it straight toward his head. Perry dodged deftly, smiling as the base smashed in fragments against the wall. With a nonchalant air he picked up his hat and stick.

"Where are you going?" cried Molly.

"I'm leaving. You'll never see me again."

Molly cried all that night. Next morning she received a telegram telling her Junior was dangerously ill!

. . . . Back in New York Al had returned to fame and Broadway in a Marcus revue. All over the city you could see the flaming billboards announcing his presence—"Al Stone—Broadway's Famous 'Singing Fool'"—as the headliner in the Marcus Revue for 1928. When you walked down Broadway at night you saw his name in yellow lights against the inky sky. His come-back was a complete success.

One night, as the stage doorkeeper at the Algonquin Theatre, where Al was appearing, sat smoking the stub of a cigar, a tidy and expensive little sport car drove into the alley by the stage entrance. Al was at the wheel and beside him sat Grace Farrel. The doorkeeper heard their happy chatter as Al parked the car. The young singer was feeling in particularly good form this evening, for the news had just reached him from Paris of Molly's divorce. That meant that he and Grace would soon be married.

(To Be Continued.)

Trust Fund For Soldiers

People Would Be Glad To Support Such a Worthy Institution

Why not start a nation-wide trust fund that shall be invested and administered for the benefit of those soldiers who gave so much, and who are receiving so little, and that little sometimes only after the unwinding of endless red tape? One dollar from every resident of Canada would create a fund that would be a most practical expression of our obligation. Almost any person could and would pay one dollar if they thought that the problem of caring for disabled soldiers could be carried out in a proper manner. Many would pay thousands. For the investment and administration of such a fund the best minds of the country would be available. It would be an honour to serve on such a Board of Administration, and men of keen business ability would bring to bear upon this problem the same good sense that they show in conducting their own business. The principle here suggested of creating a trust fund for our soldiers has already been adopted in connection with the Canadian Legion, but that fund is too small to meet the needs.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

What He Required

The tramp knocked hopefully at the door of the cottage.

"Please, mum," he said to the lady who opened it, "I'm a sick man. The doctor gave me this medicine, but I ain't got nothing to take it with.

A sympathetic light came into her eyes.

"Poor fellow!" she murmured. I suppose you want a spoon and a glass of water?"

"No, mum," he replied, "I wouldn't trouble you for that. But the medicine 'as to be took after meals. I was wonderin' if you'd got one of them 'andy?"

Minard's Wards Off Grippe.

Naturally Peeved

Magistrate: "Now tell me, what started the trouble?"

Witness: "I asked him quite perlitely who was going to be buried, and he answered sarcastically like: 'I dunno; I s'pose it's the gentleman in the hearse.'"

Mrs. Richleigh: Rembrandts are scarce, you know.

Mrs. Goldman: Yes, only the other day I noticed there are only four in the telephone directory.

There is one thing, and only one, left that cannot be jazzed — the village church bell.

What's In a Name

Evidently a Lot According To Captain Of Sailing Ships

It is a legend of the sea that you may do what you like with a steamship; change her name, alter her so that her own builder would not know her—but you must not do this with a sailing ship, for she has a soul.

This is the tragedy of the man who did, and of the fate that befell his fleet of windjammers.

The war had not ended long before Sir William Garthwaite, owner of the Garth Line, a man with a love of the sea in his blood, bethought himself that so long as there were oceans there would be room for the sailing ship.

So he bought up six of the finest windjammers, with wonderful records of service in the Cape Horn trade, but —he re-named them all and today not one of them exists.

The last of the line, the four-masted barque "Garthpool," was wrecked a short time ago off the west coast of Africa.

"Her end was what I would have wished," said Sir William Garthwaite, "she went down under own colors on a voyage—not sold to a foreigner or handed over to the shipbreakers.

"Garthpool, Garthway, Garthforce, Garthnell, Garthanald, Garthgarry . . . . one by one they have gone. One struck an iceberg, another was wrecked on an island, a third was dismasted and battered to a hulk in a typhoon, yet another had to be abandoned after a cruel buffeting by mountainous seas.

"It is true that I rechristened them, gave them all the prefix 'Garth,' for I loved them. A sailing ship has a soul, a beauty all her own. The captain of the "Mauretania" told me once he could always tell a man trained in sail.

"And now they have gone, for the Garthpool was not only the last of her type, but the last deep sea windjammer in British ownership."

Prehistoric Indian Fortification

Another Historic Saved To Be Preserved For Nation

The Southwold Earthworks, an old Indian stronghold near St. Thomas, Ont., famous among archaeologists as the only prehistoric Indian double walled fortification of which remains have been found, has been saved from oblivion by the intervention of the historic sites division of the National Parks Branch.

The old fort, the walls of which have crumbled so that they are now not more than three feet high, is reported to have been one spot at which the people of the Neurtal Nation made their last desperate stand against the war-like advances of the Iroquois who finally drove them from Ontario about 250 years ago.

The site itself covers an area of about three acres. The fort was protected by a double line of earthworks which completely enclosed it. The "moat" between the two walls was about 30 feet in width. It is thought likely that a palisade of high sharpened logs set vertically formed the superstructure atop the earthwork.

Woman Has Busy Life

Works In Factory and Runs Farm At Eighty-Two

Another milestone in the busy life of Miss Kate Hoag, Cromwell, Conn., has been reached. Her eighty-second birthday was observed as usual, at her work in the plant of a toy manufacturing company, where she has been employed for sixty-five years. She paints toys. Daily she walks three miles to the factory and then peddles newspapers. Home again at night, she has a farm to look after before she rests it a day. A brother and sister live with her.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Lady (to doctor)—"I'm bothered with a little wart I'd like to get rid of."

Doctor—"You're in the wrong office, lady, the divorce lawyer is next door."

After Skating

Rub joints and muscles with Minard's to avoid stiffness or ache. Hockey players recommend it.

MINARD'S "KING OF PAIN" LINIMENT

Needless Pain!

Some folks take pain for granted.

They let a cold "run its course."

They wait for their headaches to "wear off."

If suffering from neuralgia or from neuritis, they rely on feeling better in the morning.

Meantime, they suffer unnecessary pain. Unnecessary, because there is an antidote. Aspirin tablets always offer immediate relief from various aches and pains we once had to endure. If pain persists, consult your doctor as to its cause.

Save yourself a lot of pain and discomfort through the many proven uses of Aspirin. Aspirin is safe. Always the same. All druggists stores with complete directions.

BAYER ASPIRIN

TRADE MARK REG.

Man Has Shivered For Fourteen Years

Was Torpedoed In Arctic Circle and Has Not Been Warm Since

The coldest man in London is an omnibus conductor who claims that he has not been warm in 14 years. He told a reporter:

"I was torpedoed on August 8, 1915, in the Arctic Circle, and I've never stopped shivering since. I was serving in the auxiliary cruiser "India," and was four hours on a raft. I still dream of gasping for breath as the seas swept over us.

"Another man and I were interned in Norway, in a desolate spot, and we used to dress to go to bed."

The Medical Correspondent writes: "It is quite feasible that a mental shock should make a man cold for life. Warmth depends mainly on blood circulation, and pressure which acts to a great extent controlled by the secretions of the ductless glands. Ideas or impressions can definitely affect their action."

A Flood Of Testimonials

Perhaps the reason Commander Byrd is coming in for some criticism from other explorers is because of the flood of testimonials as to the merits of this and that used by his expedition. These testimonials presumably are well paid for by the recipients. Exploration becomes a little too commercial, perhaps, in such circumstances. But everybody's endorsing something or other nowadays.

Persian Balm—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose-leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

Oak Tree As Memorial

The million and a half French war dead have been commemorated by a single oak tree which has been planted on the place of the arch of triumph, near the tomb of the Unknown Soldier. This tree is the lieu of pilgrimage of thousands of persons daily. It is carefully tended, given plenty of water, and if it dies, it will be replaced, so that there will always, through time, be an oak tree on that spot commemorating the world war dead.

Not Under His Own Power

Spectator—It was magnificent of you, sir, to dive from that height fully clothed, and effect such a difficult rescue in this mountainous sea.

The Rescuee—That's all very well, but what I want to know is who pushed me.

Nearly 25,000 automobiles crossed the desert between Syria and Iraq this year.

The man who can mind his own business has a mind worth cultivating.

Little Helps For This Week

"Blessed is the man whom Thou chasteneth, O Lord."—Psalm xciv. 12

I know that trial works for ends
Too high for sense to trace.
That oft in dark attire He sends
Some embassy of grace;
May none depart till I have gained
The blessing which it bears
And learn, though late, I entertained
An angel unawares.
—James Drummond Burns.

Be not afraid of those trials which God may see fit to send upon thee. It is with the wind and storm of tribulation that God separates the true wheat from the chaff. Remember, therefore, that God comes to thee in thy sorrow as really as in thy joys. He lays low and He builds up. Thou wilt find thyself far from perfection if thou dost not find God in everything.—Miguel Molinos.

Old Motors Useful On Farm

Someone has taken the trouble to find out what becomes of all the old automobile engines and the result is interesting. It appears they are particularly adapted to agricultural needs, for many of them were located on farms. At sawing wood, pressing cider, mixing concrete, cutting fodder, pumping water, and threshing and grinding grain many of the discarded engines were found chugging cheerfully.

Failing Hair—Just try Minard's.

"Have you ever driven a car?" the lady applicant for a license was asked.

"One hundred and twenty thousand miles," put in her husband, who was standing near by, "and never had a hand on the wheel."

Foxes For Sweden

A cargo of 500 live foxes, gathered from the ranches in the Maritimes, Ontario, British Columbia and the State of Washington, left recently for Sweden. This follows a recent shipment to Sweden of some 250 foxes collected in the Maritime Provinces.

NERVES WERE BAD

Could Not Sleep Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long.

"A neighbor came in to see me, one morning, and advised me to take

Yours truly, A. BRYDLE

To The Ratepayers Of Redcliff

Allow me to extend to you my hearty thanks for the splendid support you gave me in the contest for councillors last Monday. I greatly apprecate your votes and will promise you to endeavor to look after your interests in the future as I have in the past.

Yours Sincerely
H. CHAMP
